Encl: (1) Listing of Worldwide Defense Property Disposal  
Offices (DPDO's) and Defense Property Disposal  
Regions (DPDR's)  
(2) Disposal Authority Codes  
(3) Sample Donation Agreement

1. Purpose. To provide updated guidance for the disposition  
and utilization of excess personal property.

2. Cancellations. MCO's 4100.8, 4500.11D, 4520.4A, 4570.15D,  
and 4570.23A.

3. Information

a. References (a) through (g) provide policy, instructions, and guidance for reporting in-use supplies and equipment which become excess to Marine Corps activities for various reasons; e.g., reduced requirements, unserviceable nonreparables. Property declared excess to the Marine Corps, by appropriate authority, for which disposal action has been directed, is reported to the nearest defense property disposal office (DPDO) for processing in accordance with references (h) and (i). Enclosure (l) contains a listing of all DPDO's worldwide, with routing identifier codes (RIC's) and Department of Defense activity address codes (DoDAAC's). All property shall be reported on a DD Form 1348-1 (turn-in document).

b. Information and instructions concerning the Department of Defense Precious Metals Recovery Program for recovery of precious metals (gold, silver, and the platinum family of metals) from residual and scrap material generated within the Marine Corps are contained in reference (j).

c. The Defense Utilization Program is the first source of supply to fill known and anticipated requirements for all Department of Defense (DoD) components. As administrator of the program within the DoD, the Defense Logistics Agency (DLA) operates several systems which are designed to make DoD components aware of what excess property is available, where it is, and its physical condition. These systems range from the mechanized front end screening system, which involves the wholesale level, to manual systems, such as weekly excess personal property lists and high-dollar value flyers.

d. In addition to those systems by which DLA advises potential users of the availability of excesses, the Defense Property Disposal Service (DPDS) (a field command of DLA located in Battle Creek, Michigan) also has the capability of providing asset data upon request. The Interrogation Requirements Information System (IRIS) provides asset availability information as to location, quantity, and condition for any item which is identified by a national stock number (NSN). Inquiries to IRIS may be made by telephone to AUTOVON 369-6695, FTS 372-6695, or commercial 616-962-6511, extension 6695. A requiring activity may institute interrogations for excess assets either on a one-time basis or for a specified period under the "want list" concept. When assets meeting the requirements established by the interrogation are located in DPDO channels, the requiring activity is advised by telephone, message, or letter of the locations, condition, and other relevant data.

30 Mar 1983

e. Marine Corps policy is to fully support and participate in programs for disposal and utilization of excess personal property.

4. Action

a. Disposition of Excess Personal Property. Marine Corps activities shall report locally generated excess personal property in accordance with references (a) through (g). Upon receipt of disposal instructions, Marine Corps activities shall utilize enclosure (1), as appropriate, except for radioactive materiel, to determine the nearest DPDO, and invoice their excesses to that office. The appropriate disposal authority code, as listed in enclosure (2), shall be listed in card column (cc) 64 of DD Form 1348-1. Marine Corps activities are encouraged to batch lot low-dollar value property for turn-in to a DPDO on a single disposal turn-in document based on the criteria contained in reference (i), chapter IV. The batch lot policy is to reduce the cost, physical handling, and administrative time required to process property to disposal. Marine Corps activities shall ensure that the disposal of excess personal property is accomplished in the most cost-effective manner possible, regardless of the Service/Agency or appropriation involved. Liaison shall be established with the nearest DPDO to schedule turn-in and to determine if there are any special requirements to be utilized in effecting the transfer. Property requiring special reporting or processing within the Marine Corps are as follows:

(1) Radioactive materiel is disposed of in accordance with the instructions contained in reference (k).

(2) The reporting and disposal of idle and excess industrial plant equipment, class 3 and 4 plant property, possessed by posts and stations shall be accomplished in accordance with the instructions set forth in reference (l).

(3) When an item of automatic data processing equipment (ADP) either leased or owned, is projected to become excess to the needs of the command, it shall be reported, prior to disposal, to the Commandant of the Marine Corps (Code CCIR) in accordance with reference (m) for utilization screening and disposition instructions.

(4) Disposition instructions for all items of garrison mobile (engineer) shall be requested from the Commandant of the Marine Corps (CMC) (Code LME) in accordance with reference (n).

(5) Controlled items that do not require disposition instructions by Headquarters Marine Corps and are excess to the major command requirements shall be reported to the Inventory

30 Mar 1983

Control Point (ICP), Marine Corps Logistics Base (MCLB), Albany, Georgia, for subsequent reporting, as appropriate, to the Primary Inventory Control Activity (PICA). The PICA will be the single DoD activity responsible for authorizing disposal of excess controlled items in accordance with instructions contained in reference (o).

(6) When turning in munitions list items (MLI's) to the DPDO for disposal, DD Form 1348-1 shall contain the appropriate demilitarization code as listed in reference (p), and the notation "demil required" or "demil not required." If the appropriate demilitarization code cannot be identified, the generating activity shall request assistance from the responsible inventory manager.

(7) All fired cartridge cases and other inert ammunition scrap material shall be inspected by a technically qualified officer, prior to turn-in to the DPDO, to ensure that the material is free from explosives. A Certificate of Inspection (form NAVMC 818) shall be executed by the inspecting officer and placed in each container in which this material is packed. Prior to turn-in of small arms weapons and parts to the DPDO, the property shall be inspected by a qualified/responsible person to ensure that the items are free from explosives. DD Form 1348-1 will contain the following certification: "I certify that the item or items listed hereon have been inspected by me and to the best of my knowledge and belief contain no items of dangerous material." DPDO's located in the United States may accept accountability for uncertified fired small arms cartridge cases having reloading potential if they are left in custody of the generating activity. When uncertified fired small arms cartridge cases are reported for sale, the following statement shall be included on the turn-in and sales referral documents: "The small arms cartridge cases listed herein may contain items of a dangerous nature, but they are considered to be suitable for reloading." It is the responsibility of the generating activity to segregate by caliber and metal type uncertified small arms cartridge cases referred to a DPDO for sale in place. The DPDO will advise generating activities of segregation and lotting requirements.

(8) When requesting disposal of all tracked and wheeled vehicles and similar equipment which involves transportation funds to transport to the nearest DPDO, Marine Corps activities shall request that disposal be effected in place with demilitarization being performed as a condition of sale.

(9) When turning in excess vehicles into DPDO's, each vehicle should be checked to ensure that only 15 to 20 percent of the fuel capacity remains in the vehicle. This would

provide adequate fuel to permit buyers to drive the vehicles out of the installation to the point where they could refuel the vehicle or reach their destination. Surveys have indicated that approximately 82,000 gallons of fuel are lost annually as a result of turning in vehicles with excessive amounts of fuel left in the tanks. However, commanders shall adhere to the safety procedures to be followed when retrieving volatile fuels from the excess vehicle gas tank.

(10) Marine Corps historical material and foreign made weapons/war trophies shall not be reported to the DPDO prior to notifying the CMC (Code HDM) in accordance with reference (q).

b. Screening of Excess Property. Marine Corps activities shall screen excess personal property listings for all known and anticipated requirements for possible utilization by the following screening methods:

(1) Onsite Screening. Marine Corps activities may screen excess personal property at DPDO's to determine the suitability of the property for filling valid requirements.

(2) Screening Excess Lists. Various DPDO and General Services Administration (GSA) excess lists, brochures, and flyers are provided to field activities for screening.

(3) Automated Screening. Those Marine Corps units processing mechanized capability may perform excess screening routines as outlined in reference (i). Direct liaison with DPDS (Code U) for inquiries to the IRIS is encouraged.

c. Acquiring Excess Personal Property

(1) To preclude unnecessary new procurements, the ICP shall submit interrogations for asset availability to all known wholesale managers in accordance with chapter XX of reference (i).

(2) All requests for excess ADPE will be submitted to the CMC (Code CCIR). Requests shall be forwarded in accordance with reference (m) and include all information required by reference (i).

(3) Requests for excess personal property from DPDO's or GSA will be initiated and controlled by the servicing supply office performing property control functions. Each requisition/request shall be annotated with a statement certifying that the property requested is required to fill a valid requirement in

30 Mar 1983

accordance with applicable Marine Corps regulations. Activities will not request quantities of property which exceed authorized retention limits.

\* (4) Effective 1 October 1983, onsite withdrawals will require the presentation of proper identification by military service customers and return of a shipping document from DPDO by mail, to the supply officer. The servicing/accountable supply officer shall:

(a) Provide individual serial numbered letters or cards of authority to each individual authorized to withdraw property from onsite DPDO's. The letter or card will include the supply officer's DoDAAC, typed name, signature, the following statement: "(named individual) is authorized to receipt for property from the Disposal System." and identifying serial number.

(b) Provide the DPDO a signature card listing the activity name, DoDAAC, serial number (s) and name of individual (s) authorized to pickup property, and the typed name and signature of the supply officer.

(c) Be responsible for maintaining current the individual letters or cards of authority and notifying the DPDO of all changes, additions or deletions to the signature cards.

(5) Excess property received for reutilization by field activities shall be accounted for in accordance with the property control procedures contained in current supply directives. Requests for principal end items for reutilization by field activities will be initiated only by the Commanding General, MCLB, Albany. Request for principal end items for subsequent removal of authorized components and repair parts to fill existing deficiencies may be initiated by field activities and appropriately accounted for.

d. Transportation. Effective 1 October 1982, packing, crating, handling, and transportation (PCH&T) cost for shipment from the DPDO to DoD activities which normally picked up property shall continue to make every effort to arrange for personal pickup of property from the DPDO.

e. Transfer of Excess Personal Property to Nonappropriated Fund (NAF) Activities. NAF activities selling goods and service, such as exchanges, commissaries, clubs, officers open messes, etc., may avail themselves of the opportunity to obtain excess and surplus personal property required for administrative purposes and other purposes from which no direct benefits will be realized by individuals. In no instances should such property be obtained for resale. The following policy interpretation

(1) For the purposes of obtaining DoD excess personal property, NAF activities are not in the same category as other military activities.

(2) NAF activities are not eligible to obtain excess personal property during the period of military screening in which other DoD activities are authorized to screen and select property.

(3) Upon expiration of the military screening period, NAF activities of the military services are given an equal opportunity with other Federal agencies to receive available excess property which has been reported to the GSA for further utilization screening.

(4) NAF activities may obtain DoD excess personal property appearing in GSA circulars by submitting requisitions directly to the appropriate GSA regional office.

(5) DPDO's are authorized to issue DoD excess material to NAF activities on the basis of requisitions approved by GSA.

(6) Property originally obtained from disposal sources and no longer needed by the NAF activity, shall be turned in to the nearest DPDO with a statement that it was obtained from appropriated funded sources and that no part of the proceeds from the sale or other disposition shall be returned to the NAF activity.

\*5. Donations/Loan of Property. Donations may be made only as authorized by the Congress and the authority delegated by the Administrator, General Services Administration to the Secretary of Defense with respect to the disposal of DoD surplus property. In addition, the military services may donate without expense to the United States, certain material not needed by the DoD to recipients authorized by statute and listed in reference (i). The donation of surplus property to an authorized donee is subordinate to any need for the property by a Federal agency but takes precedence over its sale, destruction, or abandonment.

a. Marine Corps Donations/Loans. Donations/loans by the Marine Corps are restricted to surplus military combat equipment for which the Marine Corps is the DoD integrated material manager. Authorized recipients are veterans' organizations, soldiers' monument associations, museums, and incorporated municipalities for historical, ceremonial, or static memorial display purposes. Requests for donations or loans shall be referred for approval, determination of controls, and compliance by the recipient organization with the display, security, usage, and disposal criteria as follows:

(1) Request for Marine Corps assault amphibian vehicles (recipients other than a museum) to the CMC (Code LMM-2).

(2) Request for Marine Corps historical property (a museum recipient) to the CMC (Code HD).

b. Service Educational Activities

(1) Service educational activities (SEA's) which are of special interest to the armed services are eligible to receive donations of surplus property. Only DoD surplus may be donated to SEA's. That surplus property generated by Federal civil agencies is not eligible for donation to SEA's. Examples of Marine Corps-sponsored SEA's are the Young Marines of the Marine Corps League and high schools which host a Junior Reserve Officer Training Corps (JROTC). All nominations or requests for consideration of schools or organizations will be forwarded to the CMC (Code LMM) for subsequent submission to the Assistant Secretary of Defense (Manpower, Installations, and Logistics) for approval. Enclosure (3) is an example of a donation agreement to be approved by the national organizations or high schools which host JROTC units.

(2) The head of each designated SEA (e.g., high school) is responsible for the actions of its donee representatives, for ensuring compliance with all of the terms of its donation agreement, and for accomplishing the following:

(a) Before any onsite screening, assure that its SEA representatives possess a valid screener's identification card(s) and assure that expired or terminated cards are returned to the sponsoring agency official.

(b) Authorize and require the use of Transfer Order Surplus Personal Property (SF 123) and, where applicable, SF 123a, to apply for donations; approve or disapprove the SEA representative's selections; and forward approved application to the appropriate General Services Administration (GSA) regional office.

(c) Control donated items to assure that they are used only for valid SEA purposes or redistribute within the SEA donated items which are not needed by the original SEA recipient, and report items which are no longer needed for SEA purposes as required by the donation agreement. (NOTE: Items which require demilitarization, such as weapons, fire control equipment, ammunition and explosives, aircraft, space vehicles, etc., will be reported directly to a DPDO stating that the items are no longer required and are being reported for disposition as items requiring demilitarization.)

(d) Prepare and submit the annual report required by the donation agreement to DPDS, ATTN: DPDS-U, Federal Center, Battle Creek, Michigan 49016, to arrive no later than 31 July of each year.

(e) The responsibilities of the SEA donee representative are contained in reference (i).

(3) Requests for surplus property by a unit of the Young Marines of the Marine Corps League must be submitted via the National Headquarters of the Marine Corps League. Annual inspections are not required by national organizations such as the Marine Corps League.

(4) Requests for surplus property by a JROTC unit must be submitted via the high school donee representative to the appropriate GSA regional office. An annual inspection of the property administration of the high school shall be accomplished by the applicable Marine Corps district. It should be noted that Regular or Reserve Marine Corps units are not authorized to submit requisitions for surplus property to be used by a JROTC unit.

\*6. Reserve Applicability. This Order is applicable to the Marine Corps Reserve.

DISPOSAL AUTHORITY CODES

1. Prior to the turn-in of excess personal property to the DPDO, the disposal turn-in document (DD Form 1348-1), CC 64, must contain the appropriate disposal authority code:

<u>Code</u>	<u>Explanation</u>
M	Item on this transaction are inventory materiel manager/inventory control point (IMM/ICP) stocks and are being transferred to disposal by the authority of the responsible inventory manager.
N	Items on this transaction are not reportable by virtue of an exclusion to the Materiel Returns Program (MRP) of the Military Standard Requisitioning and Issue Procedures (MILSTRIP) or other specific criteria, such as extended dollar value or condition limitation on excess reporting, and are duly authorized to be transferred to disposal.
R	Items on this transaction have been reported to the IMM/ICP in accordance with MILSTRIP MRP procedures and have been directed to disposal by the inventory manager. Excess transaction status Code SF, SL, TD, or TK was provided by the IMM/ICP on Document Identifier Code FTR.

SAMPLE DONATION AGREEMENT

**DONATION AGREEMENT**

**DEPARTMENT OF DEFENSE**

**SCHOOLS OF SPECIAL INTEREST TO THE ARMED FORCES  
(HIGH SCHOOLS WHICH HOST A JUNIOR RESERVE OFFICER TRAINING  
CORPS (JROTC) UNIT)**

See Chapter X, paragraph D; and Chapter X, Attachment 1.

In accordance with delegated authority pursuant to Section 203(j)(2) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484(j)(2)), \_\_\_\_\_ hereafter referred to as the School, has been designated a Service Educational Activity of special interest to the Armed Services. As a result of this designation, the School is eligible to receive donations of Department of Defense surplus personal property which is usable and necessary for its JROTC unit training program in accordance with procedures and conditions prescribed by the Assistant Secretary of Defense (Installations and Logistics).

The types of Department of Defense surplus personal property which the School is eligible to receive are listed in Exhibit A to this Agreement. Donations made under this Agreement are subject to the priorities established by the Department of Defense. The Head of the School or his authorized designee will certify on the application for Donation of Surplus Personal Property that the categories and quantities of donable surplus property requested are based on the enrollment in the military training program, will be used only in the Junior Reserve Officer Training Corps (JROTC) training program and will not be used for other purposes. All costs of care, handling, and transportation of property designated for donation to the School will be borne by the School. Property acquired through this Agreement will be subject to an annual inspection by the sponsoring Military Service.

When donated property is no longer needed for use by the JROTC unit, such property will be reported in writing to the State Agency for Surplus Property in the State in which the property is located, for transfer without reimbursement. If the State Agency does not require the property, the School will report the property in writing to the nearest Department of Defense disposal activity for transfer without reimbursement. Property refused by the State Agency and by the Department of Defense disposal activity will be disposed of by the School. Proceeds realized from such disposition will be deposited in a central fund administered by the School and will be used solely in furtherance of the JROTC program and will not be used for other than the military educational program of the School.

The School will provide the Director, Defense Supply Agency with annual reports, indicating the acquisition value of property acquired pursuant to this Agreement, the acquisition value of property disposed of, and the returns realized from such dispositions. Reports will be due on July 31 of each year.

This Agreement may be terminated at any time by either party upon serving of notice on the other. Such termination will not in any way affect the obligations of the School, as established by this Agreement, in connection with property donated prior to its termination.
